Did you know?

When it rains, pollutants like oil, lawn chemicals, and pet waste wash off streets and lawns and into local waterbodies without treatment.

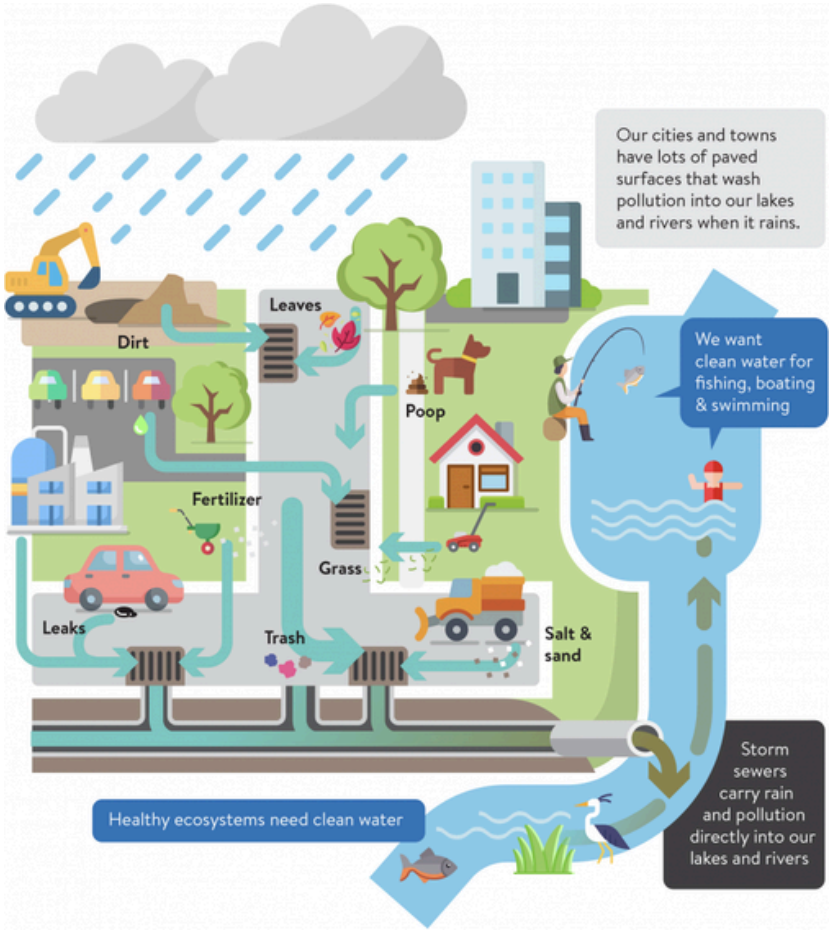
Lake Minnetonka

Here's how you can help protect our waters:

- **Pick up pet waste**
- **Limit fertilizer and pesticide use**
- **Keep yard waste out of the street**
- **Properly dispose of trash**
- **Never pour chemicals or waste into a storm drain**
- **Follow Lake Minnetonka Pollution Prevention guidelines through Lake Minnetonka Conservation District (LMCD) https://lmcd.org → resources → handouts manuals**

What is an MS4?

A Municipal Separate Storm Sewer System (MS4) is a system of storm drains, pipes, curbs, gutters, ditches, etc, that are designed to convey rainfall and snow melt towards natural waterbodies. When items other than rainwater enter an MS4, it can clog and cause flooding or pollute waterways.



Report Illegal dumping and discharges.

City of Minnetonka Beach MS4

The City of Minnetonka Beach has developed a Stormwater Pollution Prevention Plan (SWPPP) in order to meet permit requirements and maintain a clean and efficient MS4.
